

## Geoffrey Moyle, Principal, Cost Planner

I've been an active member of the building design, construction and consulting industry for 29 years and have extensive experience on a wide range of projects.

In an industry where cost over-runs and delays are commonplace, I can demonstrate an enviable track record that's yielded a wonderful portfolio of past successes, testimonials and satisfied clients.

Whether it's helping a homeowner get the home they desire; a community group the building they need; ensuring a timely restaurant fitout; or facilitating a smooth development process for a large organisation; I pride myself in getting projects on track and keeping them there... As a Cost Planner I provide professional advice to help my clients deliver the innovative (and often highly acclaimed) results they seek.

My approach is organised and practical and I don't shy away from challenges or become daunted by schedules. If I say I can assist, I will.

Starting as Quantity Surveyor, straight after finishing high school, at Padgham and Partners, and I spent a couple of years at Rider Hunt in Brisbane. Construction Planning and Economics Pty Ltd was commenced in 1997, I'm an Associate of the Australian Institute of Quantity Surveyors, a Registered Building Practitioner and have a Diploma of Quantity Surveying with Distinction (RMIT).

In my spare time, I help raise my children, listen to music, write poetry and ponder the meaning of life in north-east Victoria.

## Geoffrey Moyle, Principal, Cost Planner

“Quite frankly Geoffrey is the difference between a project proceeding and not proceeding... I’d rather design a garage that gets built than a home that doesn’t. I enjoy working with him because he makes cost planning less stressful. He supports me when I introduce him to clients whilst giving them honest, practical and realistic advice... Geoffrey is a great cost planner - I can’t imagine undertaking a project without his assistance.”

**Antony di Mase** principal of DiMase Architects

“I’ve had a longstanding relationship with Geoffrey, in fact I think I was one of his very first clients, and since then he’s worked on at least 50 or so projects with me... so much so that I almost consider him part of my staff. Geoffrey is familiar with my business and projects, helps me avoid the pitfalls and traps, saves me heartaches, time and money and provides me and my clients with worthwhile advice. Excellent!”

**Peter Maddison**, Maddison Architects

“Geoffrey is really good to work with because he understands our architectural approach and values. We use his expertise early on in the decision making process to give us a really good reflection of what a project will cost...”

**Kerstin Thompson**, Architect

“I have worked with Geoffrey for nearly two decades now and found him to be of exceptional value, both for my client and myself. He is attentive, knowledgeable, timely and importantly, accurate.”

**Keith Streames**, Architect

“I can recommend Geoffrey through many projects completed, all with a thoroughness and completeness that is often very hard to find.”

**Paul Mathis**.

“Geoffrey Moyle is quite simply one of finest and most professional business owners I have had the pleasure of meeting. His approach to service, attention to detail and level of personal commitment is so refreshing it's not funny. Friend or business contact? With Geoffrey it's definitely both.”

**Robert Gerrish**, author of *Flying Solo - How to go it alone in business*

“I have known Geoffrey for around 15 years and have observed the wide range of skills he brings to his clients who are architects, building design professionals, project managers, building owners and public authorities. I have heard first hand from clients the top job he does for them in assisting to bring projects in on time and on budget and I have seen their appreciative feedback. Quite simply he does what he promises without fanfare or ego and just delivers the goods. Use him to save time and money on your project.”

**Winston Marsh**, Owner, Business Growth Centre
